EASY AND FAST TO ASSEMBLE...

Fast 1500/1000 Milano had been designed to meet growing needs of reducing assembling timing at the site. This is the ideal mobile plant for construction companies and/or precast concrete producers asking for a high-performance level of the plant, but above all high-quality concrete level. The batching plant is constituted by two units – aggregate bins and mixing group - pre-assembled and pre-cabled, allowing to rapidly pass from transport configuration to the working one. It is transportable on n.2 open top 40' containers or on n.2 lowering bed trailers. The aggregate storage group is composed of 4 compartments with double loading point. Fast 1500/1000 Milano has a MEP planetary mixer with 1 m³ concrete output per cycle, designed and produced in Euromecc factory, result of more than 40 years of experience in concrete field.

3. SIDEBOARDS OPENING

4. ACCESSORIES ASSEMBLING

- Minimal foundation works
- Possibility of moving the plant from one site to another
- Low maintenance costs
- Saving of space with integrated control cabin
- Pre-cabled and pre-assembled at the workshop
- Speed of assembling in site
- Easy and cheap transport

Transport: 2 containers open top 40' or 2 standard truck dim 13,6 m x 2,5 m (silos not included)

TECHNICAL FEATURES	UM	FAST 1500/1000	OPTIONAL	MANAGEMENT
Theoretical hourly output	m ³ /h	45*	On customer's request, Euromecc provides a range of accessories to complete the plant. In particular Fast 1500/1000 Milano can be equipped with the following accessories:	The management of the plant is done through a touch screen control system which manages, automatically, the whole production cycle through a software easy, intuitive and completely adaptable to the user. The management system is provided with all the parameters and functions in order to satisfy all customer's requirements and to improve the plant performance. The operation of the plant is represented with a coloured graphic on the monitor, also indicating all managed components.
Aggregate storage	m ³	26 + 34	1. Manual centralized greasing system	
Aggregate storage bins	n°	4	2. Washing system for mixer	
Discharge gates/Pneumatic	n°	4/4	3. Microwave probes	
Aggregate weighing hopper	m ³	2	4. Stainless steel additives dosing system	
Aggregate weighing system	kg	3000	5. Dust filtering system	
Cement weighing hopper	m ³	0,7	6. Air-conditioned control cabin	
Cement weighing system	kg	1000	7. Automation on PC	
Water weighing hopper	L	300	8. Winter or Summer configuration	
Extractor belt with 650 mm sheet	m ³ /h	140	9. Bulkheads for the loading ramp	
Skip	L	1500	10. Mobile concrete foundations for silos	
Planetary mixer	L	1500/1000	11. Storage bins in line.	
Air compressor	L	270		
Operating voltage	V	400		
Operating frequency	Hz	50/60		
Absorbed electrical power	hp/kW	96/72		
Installed electrical power	hp/kW	120/90**		

* mixing time 30"; unloading time 25"
** basic version and for n.2 silos
